SECURITY OFFERINGS

BlackBerry | CYLANCE.

HVE offers a complete portfolio of security solutions to assist customers in security evaluation, planning, protection design and implementation, and compromise mitigation and restoration. HVE is a trusted partner for customers in K-12 and Higher Education, AEC (Architecture, Engineering, and Construction), Enterprise, Government, Finance, and Health Care.

EVALUATION: Proactive and Responsive Security Assessments and Testing

HVE provides a wide range of assessments to ensure that your environment is compliant and secure. Assessments can include periodic scheduled evaluations. Additional offerings include Phase-0, triage, governance, and control assessments. Documentation is provided following each assessment to assist with planning, remediation, and gap control.

CONTROL: Information Technology Security Governance Design and Consulting

Governance is one of the most overlooked and critical elements in realizing security success. It provides the foundation for identifying critical assets, determining value and risk, and establishing a plan for protecting and restoring your organization in the event of a compromise. HVE will evaluate your organization's risk management and security governance plans. We'll provide a comprehensive analysis and plan for program development. Finally, we'll generate controls and continuity planning to ensure your organization's success.

PROTECTION: Proven Next-Generation Threat Protection Solutions

Proven solutions include: managed zero-day threat protection, NGFW appliances, IPS/IDS solutions, email spam and AV protection, and Virtual Desktop Infrastructure (VDI) for securing intellectual property in diverse environments. HVE is an Emerald partner with Cylance, a leader in endpoint threat management. We've proven the efficacy of the Cylance platform against zero-day threats, crypto and ransomware viruses, and targeted attacks. HVE has deployed Cylance PROTECT + OPTICS in compromised environments to eliminate the spread and effect of attacks as well as providing unparalleled protection against initial compromise.

RESPONSE: Compromise and Attack Mitigation

Compromise mitigation teams include IT leaders, security professionals, and certified systems and network engineers with thousands of hours of threat mitigation and environment restoration experience across multiple business verticals.We collaborate with authorities and insurance agencies to facilitate maximum financial protection. Our engineers and partners have the know-how and experience to quickly quarantine environments, retrieve maximum data, and restore or rebuild environments to return you to operational status as quickly as possible.

TESTAMONIAL:
"HVE has become our favorite partner in the Technology business. Their experience and quality of service has been a differentiator for us.

The HVE team helped us develop a comprehensive security plan and has provided us with consulting, engineering, and products which have ensured the security and integrity of our data and systems.

Our recent move to their managed Cylance endpoint protection solution came at the right time as we are now secure in knowing that we have the best protection against the devestating explosion of ransomware and zero-day threats attacking K-12 and local govenment organizations."
